EXPERIMENT 05
Reports, dashboards and custom pages (Page Builder elements)

Aim

Build Admission_Dashboard_Page using the Page Builder elements and verify the numbers it shows.

Procedure

1. Create reports: All_Student_Enquiries, New_Enquiries (Status = New), Admitted_Students (Status = Admitted), Follow_Up_Report. Show useful columns only.
2. Create the page Admission_Dashboard_Page. Add Admission_Main_Panel (Panel) as the outer container.
3. Top strip: KPI tiles (average percentage, total enquiries, total courses, follow-up count), Admission_Conversion_Gauge (Gauge), Enquiry_Search_Bar (Search on Student Name, Enquiry ID, Email).
4. Middle: Duration_By_Seats_Chart (bar chart) and Source_Of_Enquiry_Widgets; Enquiry_Status_Board (Board) with columns mapped to Status values.
5. Lower: Full_Enquiries_Report (Report) and Distribution_By_Last_Qualification chart.
6. Sidebar: Admission_Policy_Snippet (Snippets), Certificate_Viewer (Viewer), Quick_Enquiry_Form (Form, expandable), Quick Links (Buttons).
7. Test desktop and narrow layouts; check labels, contrast and date formats.

Generated explanatory diagram. It is not a screenshot of an executed workflow.

Result

Expected result and verification criteria. All Page Builder elements are present and working; panel counts reconcile with source reports (done above for the dashboard figures); Board drag updates the record.
