EXPERIMENT 08
User management and role-based access

Aim

Apply least privilege for Admission Manager, Counsellor, Faculty and Auditor and verify that the dashboard exposes only permitted data and actions.

Procedure

1. Create distinct named test accounts per role; do not test while signed in as the app owner.
2. Create permission sets; start with deny, then grant forms, reports, fields and actions.
3. Panel visibility: Admission Manager and Counsellor open the full Admission_Dashboard_Page; Faculty see a limited view; Auditor read only.
4. Restrict report export to Admission Manager; restrict Board drag (status change) to Admission Manager and Counsellor.
5. Test direct URLs, report URLs, exports and API with separate sessions. Remove a user and confirm access is denied.

Implementation and verification

Capability	Admission Manager	Counsellor	Faculty	Auditor
Open dashboard	Yes	Yes	Limited	Read only
Create enquiry	Yes	Yes	No	No
Add follow-up	Yes	Yes	No	No
Move Board cards (Status)	Yes	Yes	No	No
Send admission update	Yes	Yes	No	No
Edit courses / seats	Yes	No	No	No
Export report	Yes	No	No	Approved only
Edit app / roles	Authorized admin only	No	No	No

Evidence and testing

E08: roles, permission sets, signed access-test matrix with allowed and denied paths, review register.

User (test account)	Purpose	Permission set	Approver	Review due
manager_test	Admission head	Manager	_____	_____
counsellor_test	Front office	Counsellor	_____	_____
faculty_test	Department view	Faculty	_____	_____
auditor_test	Compliance	Auditor	_____	_____

Access-test matrix (allowed / denied) to be completed with actual outcomes: _____

Application images and explanation

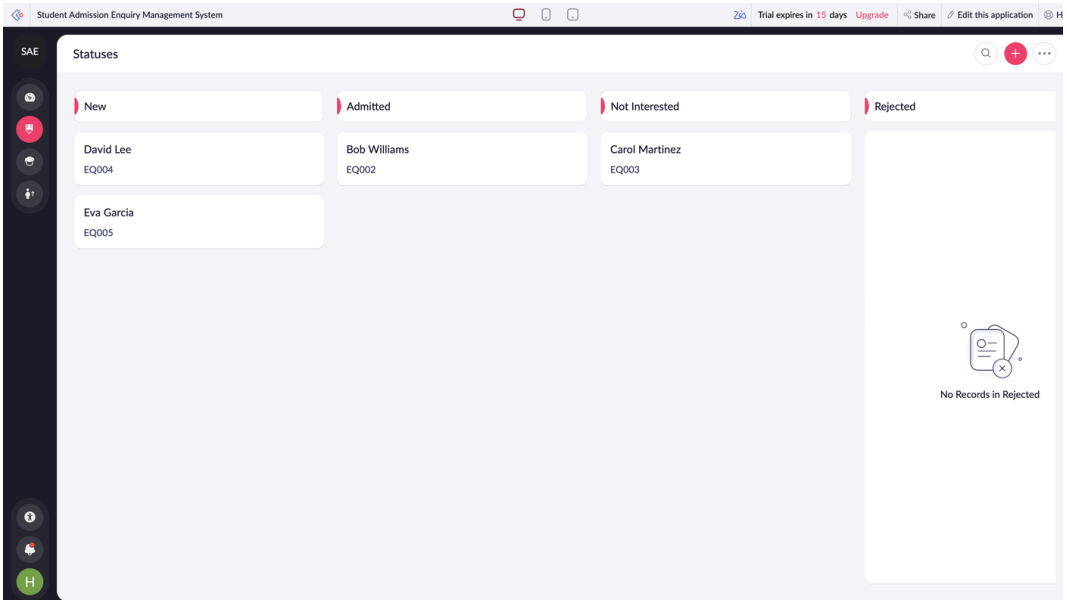

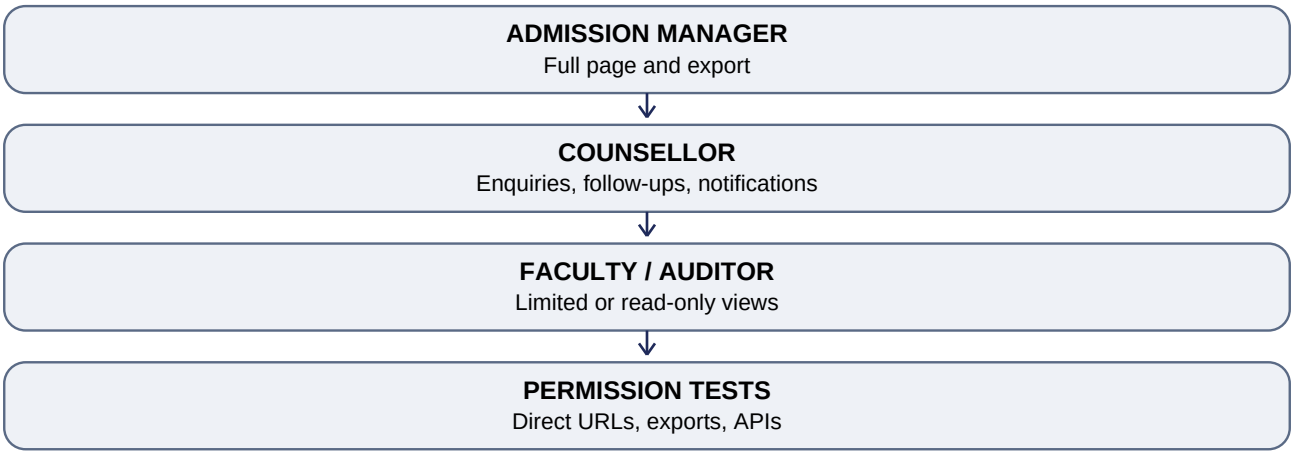

Figure 1: Statuses kanban view - card movement is limited to Admission Manager and Counsellor

Process diagram

Generated explanatory diagram. It is not a screenshot of an executed workflow.

Result

Expected result and verification criteria. Each role performs only its intended tasks; revocation is verified; unverified access remains disabled.
